Professional summary

Motivated software developer with a foundation in web development. As a Free Code Camp certified professional in Responsive Design and JavaScript/Data Algorithms, I have honed my skills through practical projects, including a web-based scientific calculator, an e-commerce platform for renting cars, and a real-time chatting application with an accompanying website. My commitment to learning and problem-solving, combined with a collaborative approach, positions me as an enthusiastic candidate eager to contribute to dynamic software development projects.

Area of Expertise

I am proficient in JavaScript, with a focus on web development using HTML, CSS, and React for the frontend. My backend development skills include Node.js, and I am experienced in version control with Git. I excel in problem-solving, applying logical and creative thinking to tackle complex challenges. A strong collaborator, I bring effective communication and teamwork to software development projects.

professional experiance

I have actively applied my skills through various projects, showcasing my capabilities in web development.

- One notable project is a web-based scientific calculator, where I utilized JavaScript, HTML, and CSS to create a user-friendly and functional tool.
- Additionally, I designed and implemented an e-commerce website for renting cars, employing React for the frontend and Node.js for the backend. This project involved features like user authentication, a comprehensive product catalog, and a booking system.
- Another accomplishment includes developing a real-time chatting application with an accompanying website, utilizing WebSocket technology for seamless communication.

These projects not only demonstrate my technical proficiency but also reflect my commitment to creating practical and innovative solutions.

Certificates

- Responsive Design Certification (September 2023)
- JavaScript and Data Algorithms Certification (September 2023)
